

Soluna Sessions

Technical rider

Standard for all DJs playing through Soluna Sessions

This is what a Soluna DJ needs as standard. Is your venue different, or do you have no DJ equipment of your own? Let us know: we will adapt or bring equipment, and the costs are then included in the proposal. Agreements in the proposal or confirmation always take precedence over this rider.

DJ setup (standard, evening and club)

- 2 or 3 × AlphaTheta / Pioneer DJ **CDJ-3000X** or **CDJ-3000** (at least CDJ-2000NXS2), with the latest firmware
- 1 × DJ mixer: Pioneer DJ **DJM-A9**, **DJM-V10** or **DJM-900NXS2** (alternative by arrangement: Allen & Heath Xone:96)
- Players and mixer linked via Pro DJ Link: gigabit network hub and LAN cable (cat 5e or higher) to each unit, plus one spare cable
- Everything connected, tested and working before the DJ arrives

Compact setup (daytime and small spaces)

- For example a coffee party, brunch or lobby: 2 × CDJ-3000 or CDJ-2000NXS2 with a DJM mixer, or an all-in-one AlphaTheta / Pioneer DJ system such as the XDJ-XZ, XDJ-RX3 or OPUS-QUAD
- Always agreed with Soluna in advance

Monitoring and sound

- 1 or 2 active **booth monitors** at head height, facing the DJ, with their own level control from the mixer (booth out)
- A sound system that suits the room and the number of guests; please agree any maximum volume or limiter in advance
- A technician or contact who knows the system, reachable throughout the set

DJ table and booth

- A stable, level table without vibrations, about **100–110 cm high**, at least 150 × 70 cm (ideally 180 × 80 cm)
- Not right next to a subwoofer or in the middle of the dance floor; a barrier between crowd and table where needed
- No drinks on the DJ table: please provide a separate spot next to it
- A dimmable booth light in the evening

Power

- At least **4 earthed sockets** (230 V) at the booth
- On a separate circuit, not shared with lighting, smoke machines, bar or kitchen

Outdoors: rooftop, terrace or beach

- Cover over the equipment against rain and direct sunlight (screens become unreadable and players can overheat)
- A wind-proof setup; power and cables protected from water
- In case of a code orange or red weather warning, the force majeure provisions of our booking terms apply

Microphone

- 1 microphone (wireless or wired) with an on/off switch, connected to the mixer, for short announcements

Setup and changeover

- Access to the booth at least **30 minutes** before the set; 60 minutes for a short line check at a first booking in a venue
- When DJs change over: 10 to 15 minutes overlap

What the DJ brings

- Headphones and music on USB stick or SD card (rekordbox)
- Own controller or laptop only if agreed in advance; please then provide space and a free mixer channel

Recordings

- Please agree any recording of the set (audio or video) with Soluna and the DJ in advance
